

## Methods and Mechanics of Floral Design

Presented by Amy Dunlap, head designer & owner of the Winston-Salem Flower School

Ready to learn some of the methods and mechanics that floral designers use on a daily basis? This meeting will cover the basic elements of design and share some favorite floral preparation and design techniques. Learn how to make delicate flowers last longer in arrangements, how to tackle an odd-shaped container, and join a discussion on color theory and negative space in floral design. These are just a few of the topics we will cover in this demonstration-only class.

GUESTS are welcome to attend. There is an \$8.00 for this workshop. The fee will be waived for anyone joining the Garden club that night.

**Sedgefield Garden Club**  
**Tuesday, February 20, 6:30 p.m.,**  
**Griffin Recreation Center, 5301 Hilltop Road, Jamestown, NC**
